My Desk, Provides all what you need in your work desk in electronic form:

- **Front Page**, Give you all important information in a single screen, as the figure before. In this page you will get the summary of 10 newest email, news, forum, gallery, polling. You also have a simple form to write your event in your calendar (it is like you write in your agenda book or PDA) , and message to sent by sms. Not only that, You can view your agenda on the current day, weekly, or monthly, choose the theme which you like, see the current online user. Yes, all these information is provided in a single screen.
- **E-mail**, robust mail server and web mail client, all mail operation including POP mail, filtering mail, block address, auto forward, vacation response etc.
- **Calendar**, All what you done in your agenda can be convert into electronic view, with a lot of benefits : create, update, delete event. Sharing events to your friends, group, or organizations, reminder event using mail or sms, invitation event using automatic mail, meeting time matching, and more other operations.
- **Forum**, All discussion can be done in here. It can replace mailing list and allow you to express all what you feel dynamically by using emoticons, tag html, colored, and more categorized according the topic.
- **Task**, remind you what you have to do, in a list of task, its priority, time, and status.
- **News**, gives you all news form the company, organizations, friend, group in a nice screen. . Off course, You can also create a news and shared it to them. It supports image and tag html. The news is categorized according the topic and the sender.
- **Folder**, it provides private, organizational, and shared folder. You can get a file from others in organizational and shared folder. You also can shared your file your friends, group, organizations. All operations folder are provided : create, delete, update folder, search file, sharing, and etc.
- **Gallery**, a special directory to save all images and categorized according the topic. The contents can be shared to users, group, and organization. You also can receive from them too. This channel will can be used to express happy, sad, fun images. The documenter of your activity, group, organizations can also be put in here. It support JPG, BMP, and GIF files.
- **Poll**, a channel to express the opinion from each user. Polling can be applied to users, groups, and organizations. It can contain a lot of questions with a lot answers. The result of the polling is described as an image of pie, bar, line. Area, both in 2 Dimensions or 3 dimensions. Each Polling has life time.

- **Chat**, all member ebdesk Collaboration can chat in a room, which categorized in own, group, and organization. User can express the statement using color font and emoticons too.
- **SMS**, a simple way to send a message to a mobile phone using Short Message Service (SMS).
